All five management systems and their associated activities and products address the three following areas of application:

- **Drymix**, additives for the dry mortar industry
- **Admixtures**, additives for concrete
- **Industrial building materials**, additives for e.g. insulating materials and fillers

At the same time, we are dedicated to protecting the environment, and to sustainable socioeconomic development.

Mixed to resist. Product Portfolio for Concrete Admixtures

SITREN®, SITREN AirVoid® and TEGOSIVIN®

We understand our customers’ challenges, in fulfilling the requirements their products have to meet, and their manufacturing processes. In addition, we offer a broad product portfolio, extensive experience and specialized technical expertise, plus our in-depth knowledge of applications and markets.

As the same time, we are dedicated to protecting the environment, and to sustainable socioeconomic development.

With more than thirty years’ experience in product design, we continuously improve and evolve our products. As a result, our solutions set new standards in terms of efficiency and performance.

**RECOMMENDED CONCRETE SUPERPLASTICIZER**

- Polycarboxylate ether (PCE): Suitable
- Lignosulphonates: Suitable
- Sulphonated naphtalene formaldehyde (SNF): Suitable
- Sulphonated melamine formaldehyde (SMF): Suitable
- Blends (e.g. PCE – lignosulphonate): Highly recommended

**APPLICATION AREAS**

- In-situ concrete / Readymix concrete
- Precast or prefabricated concrete
- Special concrete
- High performance concrete
- Air-entrained concrete
- Self-compacting concrete
- Non-entrained concrete
- Other concretes

**PRODUCT RECOMMENDATIONS FOR FORMULATION MANAGEMENT ARE AVAILABLE ON REQUEST.**
